

## Kiwifruit Nurseries with KPCS Certified Plants

KPCS Full Certification plants are certified plants that meet the testing requirements for all target organisms including Psa-V. Nurseries that meet this standard have demonstrated that they can keep Psa out of their nursery and plants have tested Psa-Not Detected.

Restricted Certification plants are produced under the KPCS standard and are tested with the alternate Psa testing regime. Plants from these nurseries are exposed to Psa and may test positive for the common New Zealand form of Psa-V but are tested for non-New Zealand strains of Psa, as well as Streptomycin and Copper resistance. **They can only move to Psa-V positive orchards.**

**NB: ALL Zespri licensed Red 19 (ZES008) plants are Restricted Certification as budwood is sourced from Psa positive orchards.**

Nursery Name	Plants Supplied	Orchards & Regions they cannot supply	Location of Nursery & Region Status	Contact	Full Certification	Restricted Certification
<b>Amber Nurseries</b>	Containerised Bruno rootstock & small Bruno seedlings	Far North South Island	Cambridge Recovery	Robert Clancy 027 600 7498	All plants	-
