

Kiwifruit Nurseries with KPCS Certified Plants

KPCS Full Certification plants are certified plants that meet the testing requirements for all target organisms including Psu-V. Nurseries that meet this standard have demonstrated that they can keep Psu out of their nursery and plants have tested Psu-Not Detected.

Restricted Certification plants are produced under the KPCS standard and are tested with the alternate Psu testing regime. Plants from these nurseries are exposed to Psu and may test positive for the common New Zealand form of Psu-V but are tested for non-New Zealand strains of Psu, as well as Streptomycin and Copper resistance. **They can only move to Psu-V positive orchards.**

Nursery Name	Plants Supplied	Orchards & Regions they cannot supply	Location of Nursery & Region Status	Contact	Full Certification	Restricted Certification
