

Spring Psa symptoms – photo gallery

A mix of symptoms seen by KVH over the last week to 10 days

Failed Gold3 canes (Te Puke)

Hayward leaf spot – this was adjacent cane with exudate (Edgecumbe)

M33 leaf spot (Katikati)

Darkened tissue under the bark indicating infection (Te Puke)

Shoot and cane collapse (Te Puke)

Infected grafts, young Hayward and Gold3 blocks (Tauranga)
